### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Goodson.

Goodson shows a bicycle anti-theft device for a bicycle including a separating means for dividing the steering column into two parts A, B which are relatively fixed in one state and not fixed in a second state. A piece P is inserted in the column parts and aligns them in the first state and is removed from them in the second state.

3. Claims 4-15 and 20-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Niederberger shows neutral threads between the steering column and head tube of a bicycle.

Hunter, Riess, Chou, Johnson, Hon, and St. Hillaire show dividable steering stems.

Yang , Klein, McConley, and Rathbun show bicycle steering stem locks.
